## **SFDR CISD RECEIVES NOTIFICATION OF COVID-19 RELATED CASE**

On Sunday, May 24, 2020 SFDR CISD learned that an employee, assigned to Buena Vista Elementary, has tested positive for the COVID-19 virus. This same employee worked at the Buena Vista gym on May 20th, between the hours of 9:00 a.m. and 12:00 noon, facilitating the “parent pick up” of 3rd grade student’s belongings.

SFDR CISD has verified that the employee never had contact with any of the items being retrieved by parents, and that the employee was wearing a mask during all parent interactions. Additionally, parents were asked to wear a mask when entering the gymnasium to retrieve their child’s items. However, in the spirit of full transparency and out of an abundance of caution, SFDR CISD is making this public statement.

SFDR CISD will make every effort to contact every person who is believed to have had contact with the infected employee. In the interim, local health authorities advise that any parent who may have visited the Buena Vista gymnasium on May 20, 2020, between the hours of 9:00 a.m. and 12:00 p.m., should be checking their temperatures twice a day, and self-monitor for symptoms such as cough, congestion, body aches, fever, chills, sore throat, loss of smell/taste and gastro intestinal symptoms. If any of these symptoms develop, the individual should contact their primary health care provider (physician) for immediate testing.
