

SAN FELIPE DEL RIO CISD

Press Release – January 31, 2023

DISTRICT MONITORING WINTER WEATHER CONDITIONS

(Del Rio, Texas) SFDR CISD officials have announced plans for a **normal school day** tomorrow. While communities in North and Central Texas have experienced varying weather conditions that have impacted road conditions in their communities, the forecast for the Del Rio area shows no indication of precipitation or accumulation that would make the roads and streets hazardous for buses and private vehicles.

Officials will continue to monitor the winter weather conditions throughout the evening and into the early morning hours. If inclement weather is predicted and approaches, then the District will follow its Inclement Weather Protocols to determine if an adjustment to the instructional day is necessary to ensure student, staff and community safety. If necessary, a revised Weather Alert with further details will be released no later than 5 a.m. via all media platforms. Parents, guardians and staff will be notified by email and phone.
