3.
a. <mark>DUAL-CREDIT-INDICATOR-CODE (E1011)</mark> indicates whether the student was eligible to receive both high school and college credit for a college course.

Advanced Placement courses reported on Student Academic Record Reference Complex Type cannot be reported as dual credit unless the course has been approved as an AP® course by the College Board through the AP® Course Audit. A College Board-approved AP® course must adhere to the AP® course descriptions and be approved through the AP® Course Audit. This means the college instructor must have submitted his/her course syllabus and have received approval in advance.

b. <mark>COLLEGE-CREDIT-HOURS (E1081)</mark> indicates the number of college hours a student earned for the completion of a dual credit course.

If a student completes a dual credit course and does not pass the course, then the COLLEGE-CREDIT-HOURS will be reported as 0.
When a course is reported as eligible to receive dual credit, be cautious to avoid duplicating the college credit hours earned across multiple course sections. College credit hours should generally only be reported when a student completes and passes a one semester course or the last part of a multi-part course.

c. <mark>ATC-INDICATOR-CODE (E1058)</mark> indicates a high school course for which college credit may be awarded by a post-secondary institution under the conditions of a local articulation agreement or the statewide Advanced Technical Credit (ATC) program agreement.

ATC courses cannot be reported as dual credit courses. Likewise, Dual Credit courses cannot be reported as local or statewide articulated (ATC) credit. These rules are enforced by fatal validation rules.

COURSE-SEQUENCE-CODE (E0948) identifies the unique part(s) of a course when a course is taught during a single grading period or semester or across multiple grading periods or semesters.

The COURSE-SEQUENCE-CODE identifies how the course was taught to the student during the school year, or in the summer. The COURSE-SEQUENCE-CODE identifies the order in which the course was scheduled in the class scheduling system.

Dual credit COURSE-SEQUENCE-CODEs are used for dual credit courses only.

CLASS-TYPE-CODE (E1055) identifies the type of class providing instruction to students in particular class settings.

Code Table Id	Name	XML Name	Date Issued	Date Updated
C179	CLASS-TYPE-CODE	TX-ClassType	03/02/2009	
Code	**Translation**			
01	Regular This code is used for all settings not mentioned below including regular classroom, laboratory, or shop settings.			
02	Non-Regular Classes designed for students in the following settings. • In-School Suspension An on-campus setting for students who commit disciplinary infractions, where the student continues to receive instruction in each course to the extent possible • School-Community Guidance Center A program that meets the requirements for school-community guidance centers as specified under TEC §37.051-37.056 • Alternative Education School Program for Discipline A program for students who have been removed in accordance with TEC §37.008 from the students' assigned campus and placed in an alternative educational campus/program operated by a school district either alone or in cooperation with other school districts, juvenile agencies, or other governmental entities • Televised Instruction This setting is for providing instruction in which the content of a course for credit is delivered primarily through televisual technology, such as interactive television, videotaped courses, or the Internet • Non-disciplinary Alternative Education A program for students who receive instruction in a non-disciplinary alternative educational setting (not under TEC §37.008) • Special Education Setting • Residential Care and Treatment Facility			

POPULATION-SERVED-CODE (E0747) identifies the student population for which a service has been designed or is intended. It does not necessarily identify the program eligibility of the students who receive the service.

A service (classroom or non-classroom) will have a single POPULATION-SERVED-CODE value (e.g. "01" for regular students) even when members of other student populations happen to be served. It is only when the service has been tailored for a special student population that POPULATION-SERVED-CODE should be given values that apply to special student populations. If two or more populations are being served, only one should be reported, using the population for which the service was designed.
