a. DUAL-CREDIT-INDICATOR-CODE (E1011) indicates whether the student was eligible to receive both high school and college credit for a college course.

Advanced Placement courses reported on Student Academic Record Reference Complex Type cannot be reported as dual credit unless the course has been approved as an AP® course by the College Board through the AP® Course Audit. A College Board-approved AP® course must adhere to the AP® course descriptions and be approved through the AP® Course Audit. This means the college instructor must have submitted his/her course syllabus and have received approval in advance.

b. COLLEGE-CREDIT-HOURS (E1081) indicates the number of college hours a student earned for the completion of a dual credit course.

If a student completes a dual credit course and does not pass the course, then the COLLEGE-CREDIT-HOURS will be reported as 0.
When a course is reported as eligible to receive dual credit, be cautious to avoid duplicating the college credit hours earned across multiple course sections. College credit hours should generally only be reported when a student completes and passes a one semester course or the last part of a multi-part course.

c. ATC-INDICATOR-CODE (E1058) indicates a high school course for which college credit may be awarded by a post-secondary institution under the conditions of a local articulation agreement or the statewide Advanced Technical Credit (ATC) program agreement.

The Advanced Technical Credit program is being phased out, with the last ATC courses being offered in 2018-2019.

ATC courses cannot be reported as dual credit courses. Likewise, Dual Credit courses cannot be reported as local or statewide articulated (ATC) credit. These rules are enforced by fatal validation rules.

==POPULATION-SERVED-CODE (E0747)== identifies the student population for which a service has been designed or is intended. It does not necessarily identify the program eligibility of the students who receive the service.

A service (classroom or non-classroom) will have a single POPULATION-SERVED-CODE value (e.g. "01" for regular students) even when members of other student populations happen to be served. It is only when the service has been tailored for a special student population that POPULATION-SERVED-CODE should be given values that apply to special student populations. If two or more populations are being served, only one should be reported, using the population for which the service was designed.
