Introducing
Bus View

What is Bus View?

Bus View is a multifunctional system that allows us to:
- Track buses in real time.
- Monitor and optimize routes.
- Record student boarding and drop-off activity.
- Communicate efficiently with parents through a mobile-friendly app.
- Improve safety.

Parents who use the Parent View App will have the capability to track their child in real time and receive messages when buses are delayed!

The Bus View tracking system will monitor all bus riders Pre K-12th grade.

Parents must request and confirm bus transportation for their child each school year on Skyward.

Registered bus riders will be issued a badge for tracking students when they board the bus, while they ride to and from school, and when they load off the bus.

For more information about registering your child for transportation services, please contact your child's school.
